Roe-D-Hoe January 28th, 10:30am

Settle a score with a co-worker, challenge a boss or simply show-off your equipment operator skills, and do it during the 2012 “Survival of the Fittest Conference: Roe-D-Hoe.”

Registration for participation in the Roe-D-Hoe occurs at the Conference, at the time of the event. Compete in events like:

Golf Ball & Spoon

The object of this event is to use a soup spoon taped to the tooth of the bucket to pick up a golf ball from a bucket of sand, swing the bucket without dropping the ball and put it into a safety cone or bucket.

Two on Spreader Bar Baseballs

The object of this event is to pick up the spreader bar with 2 baseballs connected to them. Put one ball in to the L shaped pipe and then the second in to a second one. Without removing the longest one from the pipes, pick the second one out and put into the 3rd hole. Remove both balls without knocking over the pipes, place the spreader bar back on the stand and set the bucket back down on the ground.

Single Ball on Cone & Pipe

The object of this event is to pick up the single ball by the rope attached and swing it over to the cone and balance it on top of it, then swing over to any of the pipes and balance the ball on two of them. Return the ball and release. Place bucket back in start position.

Pull Through the Alarm

The object of this event is to not ground out the ring and wire, setting off the alarm.
